

Data Center Decommissioning

Powering down and dismantling a data center can be tricky and risky. Make it smooth, easy and secure with Guardian.

A safe, secure, and documented dismantling is essential. Guardian has the expertise, process, personnel, and equipment for any size or type of decommissioning project anywhere in the US.

Manage site decommissioning from start to finish (cage, closet or full facility)

- Planning and Site Surveys
- Inventory and Reconciliation
- Budgeting and Quoting
- Execution and Communication
- Completion and Inspection
- Documentation and Certificates

Forget mess and stress

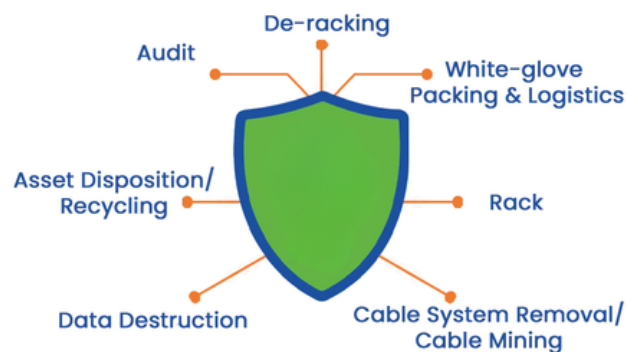

Guardian specializes in customer confidence and peace of mind. From our first call, you'll have full visibility and control over the project plan. Our broad range of services are combined to meet every project scope, including data destruction, removal, logistics, and cable mining.

You'll have full documentation, including asset transfer forms and chain of custody.

Talk to Guardian and decommission it right.

Replace finger pointing with single source expertise

It's rare that IT decommissioning doesn't include some **elements of equipment audit and verification, data destruction, lease return, equipment removal, packing and shipping, and more.** As a full-service, turnkey provider, Guardian is a complete and tested solution that is fully equipped to deal with unforeseen problems. And, if there are unexpected "surprises" (there inevitably are), you'll be impressed with our solutions and responsiveness

THE GUARDIAN DIFFERENCE

OUR GOAL: ELIMINATE SURPRISES

Data center decommissioning projects can be complex, with high-value equipment and high stakes. That's why you need a partner that has the experience and project planning know-how.

Our process is mapped to the project

Guardian's teams travel to any location and remain onsite through the entire equipment removal operation. The Guardian process includes review and verification by an experienced project management team so that we arrive prepared.

Game day agility

Readiness helps us find and resolve unforeseen problems. The trouble is, there isn't a job that doesn't have an unexpected wrinkle that could upset the applecart. But it won't. You can count on our experience and our immediate, resourceful response. More importantly, our communication is open, frequent, and thorough.

Make sure your decom is smooth

Guardian is a single-source solution for dismantling, de-racking, disconnecting and moving network equipment, servers, racks, and cabinets.

- Minimum IT downtime with coordinated scheduling and timelines
- Prioritization of mission-critical tasks
- Flexible scheduling and security measures
- Protection against risk and damage with our experienced technicians
- Maximum insurance coverage
- Onsite project management with constant and consistent communication
- Planned scope and pre-execution walk-thru
- Secured assets from disconnect to disposition
- Packing and transport for storage, redeployment, remarketing or recycling

Let Guardian handle your onsite execution so you can focus on everything else.
