DATA SECURITY
FOCUS

THE CHALLENGE A PROJECT AT RISK

A global company, with nearly 100 locations across the United States, faced a critical challenge in managing the secure disposition of IT assets during a nationwide equipment upgrade.

The project required precise coordination, with each location closing for two days: one for old equipment removal and the second for new equipment installation.

The client initially engaged another provider but encountered significant services issues and unreliable service delivery, jeopardizing data security and project timelines.

The project was at risk of failure.

OUR ACTION WE TOOK CONTROL. WE DELIERED.

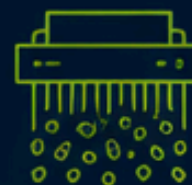

Guardian was brought in to salvage the project, initially taking over a limited number of locations. Demonstrating exceptional reliability and precision, Guardian quickly earned the client's trust, leading to the full transfer of the entire project.

- ✓ Dedicated project management team overseeing all locations
- ✓ Strict two-day closure schedule adhered to at every site
- ✓ On site hard drive shredding ensuring data security
- ✓ Secure packing and shipping of assets to a central facility
- ✓ Complete chain of custody and documentation at every step
- ✓ Operated as an extension of the client's operations

**SECURE ON-SITE
SHREDDING.
STRICT PROTOCOLS.
